# Two stripes for quality

## PROFILE //

Ford Transit Profile Ambulance

## Profile safety

Safety is the main priority in every Profile ambulance. The feeling of the safe working environment helps you to concentrate to the most essential to the patient

### Safe sitting and standing

All Profile ambulances are designed to serve safely. You can be seated with your seat belt fastened and still reach both the patient and the most essential equipment. Holding rails in all the right places facilitate moving inside the vehicle, coming in and going out.

## Profile design

A versatile equipping and good ergonomics have made Profile ambulances a success.

### Ergonomical working space

All the most essential treatment equipment are reachable even by being seated. Spacious paramedic table also includes adjustment properties for oxygen and electric systems. Out turning cabinet for oxygen bottles spares your back and is also a real time saver.

### Reliable electrical system

Intelligent electrical system (IWS) takes safely care of the routine procedures. General functions includes a.o. monitoring of the temperature and oxygen level of the incubator, stepless ventilation control and a guard for power consumption. DIN sized operation panels are located both to the driver's cabin and patient compartment. IWS system has 24 hours overhaul and after sales services on weekdays.

## Range

Ford Transit Profile ambulance is an economic choice for efficient first aid operations and patient transportation.
